To allocate your window cost, please round up or down your window measurements to the nearest 10cm. For example 68 x 82 cm = 70 x 80 cm. To ensure the correct measurements of your window, use a metal tape measure and measure your window to the nearest millimetre. Please be aware that if you are measuring more than one window, they can differ in size to one another and tend to be narrower at the top. To combat this, measure your window in a few places and take the smallest measurement. Signature will cut the window vinyl precisely to your measurements. Should your window measurements not appear in the chart, please contact us for a quote.

If applicable choose the position of the design:
